OF THE

CALIFORNIA NURSERY CO.

NILES, ALAMEDA CO., CALIFORNIA

Season of 1897-8

Dec. 1st, 1897

LOCATION:

ONE-HALF MILE NORTH OF NILES STATION, CENTRAL PACIFIC RAILROAD
TELEPHONE CONNECTION FROM STATION TO OFFICE

OAKLAND, CAL.
PACIFIC PRESS PUBLISHING CO.

To Correspondents.

1st. All orders should be sent in as early as possible.

2d. Orders should be legibly written out on a separate sheet and not mixed up in the body of the letter, thereby saving us a great deal of trouble, and tending to prevent mistakes.

3d. The articles in the following list will be furnished at the annexed prices *only* when the quantity specified shall be taken. FIVE HUNDRED, however, will be furnished at the THOUSAND rate, FIFTY at the HUNDRED rate, and FIVE at the TEN rate. In no case does this mean so many trees of assorted classes, but like the prices in the body of the catalogue, refers only to one class of assorted varieties, for instance, 5 Apples, or 5 Pears, or 5 Plums, of different varieties, but not 2 Apple, 2 Pears, and 1 Plum.

4th. Where particular varieties are ordered, and particular ages and sizes of trees, kind of stock, etc., it should be stated whether, and to what extent, substitution will be allowed in case the order can not be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of varieties is left *entirely* to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

5th. All trees and plants are carefully labeled, and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material only, will be made; but no charge is made for the delivery of packages at the railroad or express offices at Niles.

6th. It is requested that explicit directions for marking and shipping packages accompany each order. When it is left for us to choose the mode of conveyance, we will exercise our best judgment; but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the forwarders.

7th. Our customers are requested to notify us immediately of any errors that may be committed in filling their orders, so that we may at once rectify the same, as we desire to conduct our business in all respects satisfactorily to those who favor us with their confidence.

8th. Orders from unknown correspondents *must* be accompanied by the cash, or satisfactory reference. Orders to be sent C. O. D. *must* be accompanied by at least one-half the amount in cash; otherwise, they will receive no attention.

9th. Remittances may be made by draft on San Francisco, Wells Fargo & Company's and Post-office money orders on Niles, or cash by express, prepaid.

10th. Orders priced at single rates, and not exceeding four pounds in weight, can be forwarded by mail, postage paid; but where possible we recommend having them sent by express, as we are then able to send much stronger and better plants.

All communications to be addressed to

CALIFORNIA NURSERY COMPANY,

Niles, Alameda County, Cal.

REMARKS.

We again take pleasure in submitting to the kind consideration of our friends and the public generally, our price list for the coming season, and in returning thanks for the generous patronage bestowed on us in the past. It is needless to say, we earnestly desire a continuance of the favors of our former customers and at least a trial order from those who have not heretofore dealt with us. Our stock has done very well generally the past summer, and our selection is larger and more varied than ever.

A cordial invitation is extended to all to visit our grounds, whether as intending purchasers or otherwise.

To reach our nursery from San Francisco, take the broad-gauge ferry boat for Oakland, leaving at 6:00, 8:30, and 11:00 o'clock A. M. and at 1:00, 2:00, 3:00, 4:30, and 6:00 P. M. These make close connections with through trains direct to Niles. From Sacramento and all points centering there, the train leaving at 10:25 A. M. for San Francisco, via Lathrop, Tracy, Livermore, etc., should be taken. From San Jose and its southern connections, trains leaving at 5:45, 6:35, and 9:20 A. M. and 1:15 and 5:00 P. M.

Very respectfully,

CALIFORNIA NURSERY COMPANY.

JOHN ROCK, President.

R. D. FOX, Vice-President.

J. H. HENN, Secretary.

CENTRAL BANK, Oakland, Cal., Treas.

DIRECTORS.

JOHN ROCK,

R. D. FOX,

THOMAS MEHERIN,

JOHN H. HENN,

H. M. SANBORN,

WM. J. LANDERS,

E. E. USLAR.

SPECIAL NOTICE.

Those only who can show a certificate of recent date with our signature and the seal of the company attached, are authorized to solicit orders for us. We wish to call special attention to this notice, as we know it has heretofore been the practice of unprincipled persons to procure the catalogues of prominent nurseries, and take orders in their names, which they fill with poor stock bought elsewhere. If our patrons will notify us of any person whom they have reason to believe is not a regularly appointed agent, we shall consider it a favor.

HINTS ON TRANSPLANTING.

The many excellent treatises on Fruit Culture which have appeared within the past few years—one or more of which should be in the hands of every person intending to plant—render it almost unnecessary to give any directions in that line; yet we are so frequently asked for advice in this way, that we have concluded to offer a few general remarks.

The situation of the orchard having been decided on, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots, when spread out in their natural position. In planting, the top soil should be broken down into the hole, and worked carefully in between every root and fiber, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may in light soils stand from two to three inches deeper than it stood in the nursery; but in heavy clay or wet ground it is advisable to have it stand at the same height as it was before transplanting.

On account of our long, hot, dry summers, we have found it beneficial to shade the sunny side of the tree with a board or shake stuck in the ground a few inches away from it, for the first two or three years. The tops should be shortened in more or less, in proportion to size and variety of tree and condition of roots.

A work, "California Fruits and How to Grow Them," by Prof. E. J. Wickson; the "Raisin Industry," by Prof. Gustav Eisen; and "Grape Culture and Wine-making," by Geo. Husmann, will be found very useful to all horticulturists, written as they are for this coast, and by authors of wide local experience.

DISTANCES FOR PLANTING.

Standard Apples	25 to 30 feet apart each way
Standard Pears	20 to 25 " "
Strong-growing Cherries.....	20 to 25 " "
Duke and Morello Cherries.....	18 to 20 " "
Standard Plums and Prunes.....	18 to 20 " "

" 21 " " 	48	55
" 22 " " 	35	40
" 23 " " 	27	31

RULE—SQUARE METHOD.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560) will give the number of plants or trees to the acre.

RULE—EQUILATERAL TRIANGLE METHOD.—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

PRICE LIST

— OF —

CALIFORNIA NURSERY Co.

SEASON 1897-98.

Prices quoted herein are for quantities and sizes specified; *for other sizes or quantities than mentioned, special prices will be made.* Estimates cheerfully furnished on all lists. Write us.

☞ For Index, see last page of Catalogue.

FRUIT DEPARTMENT.

All our Fruit Trees are grown on *whole* Seedling roots. The advantages of these in promoting the health and thriftiness of trees over those grafted on pieces or sections of roots, or budded on stocks grown from cuttings, is acknowledged by the best authorities, and is easily apparent to the most casual observer.

	Each.	Per 10.	Per 100.	Per 1000.
NEW APPLES				
Bismarck ✓ Introduced from New Zealand; very large, remarkably handsome and showy; flesh yellow, tender, juicy; quality good; extremely hardy and prolific; bears early. November to February.				
1 year.....3 to 5 ft.	50	4 00		
Glowing Coal ✓ Remarkable for its large size, great beauty, and superb quality, the size in fact might be called enormous, ordinary specimens weighing 16 or 20 ounces. Each specimen is a bright				

	Each.	Per 10.	Per 100.	Per 1000.
New Apples—				
glossy red on one side, and the other half an intense scarlet; as the fruit hangs on the tree it may be seen for a long distance, appearing among the dense foliage like "Glowing Coals," hence the name. The flesh is of extra high quality, rich yellow color, smooth refined texture, and high, sprightly, sub-acid flavor; an early and heavy bearer, and strong grower. September.				
1 year.....3 to 5 ft.	75			
Paragon→Seedling from Tennessee; the original tree, over fifty years old, is still vigorous and bearing. Young trees show great vigor of growth, come to bearing very young, and are very productive; fruit large, roundish, somewhat flattened; color dark red, slightly streaked; flesh firm, yellow, crisp, aromatic, sub-acid and juicy, rich and of excellent quality; very late keeper; its full size, showy appearance, long keeping, and splendid shipping qualities, render it very valuable as a market or family variety.				
1 year.....3 to 5 ft.	75			
Ruby Gem→An exceedingly beautiful Apple, of medium size, and perfect form; the skin is of the most brilliant red imaginable, flesh snowy white, tender, crisp, juicy, mild sub-acid and simply delicious; tree a strong grower, with abundant foliage, and an enormous and early bearer. 1 year.....3 to 5 ft.				
Starr→Originated in Woodbury, N. J.; a very valuable early market Apple, invariably realizing the highest price in its season. The tree is a good grower, fruiting young, and producing annually abundant crops; fruit very large—11 to 12 inches around; showy, pale green, with handsome blush on sunny side; pleasant, sub-acid; a very superior cooking, and very good eating variety, also an excellent shipper, for so early an Apple.				
1 year.....3 to 5 ft.	75

Cherry— Lambert, 1 year.....	4 to 5 ft.	50	4 00		
Originated by Mr. J. H. Lambert, Portland, Oregon. It has shown itself to be a regular and heavy bearer, the fruit is always of large size and good quality. The color is a deep rich red, flesh firm, and flavor unsur- passed. As a shipping variety it has no superior. Time of ripening, two weeks later than Napoleon Bigarreau.					
Cherry— On Mazzard, 2 and 3 years....	4 to 6 ft.	35	2 50	10 00	80 00

	Each.	Per 10.	Per 100.	Per 1000.
NEW JAPANESE PLUMS				
ON MYROBOLAN				
Berckman's Sweet Botan ✓ Large, round, slightly oblong; skin yellow, with bright red and light purplish bloom; flesh yellow, of excellent quality; tree vigorous, productive and a reliable bearer; an exceptionally good keeper, Clingstone.				
Hale ✓ 1 year.....3 to 5 ft.	75	5 00		
Hale ✓ A very handsome, large, round plum; skin orange, thinly overlaid with mottled red; flesh yellow, soft and juicy, with a delicious slightly acid peach flavor. Very late. "The most beautiful, most delicious, most vigorous and one of the largest of the Japanese plums," according to Mr. J. H. Hale, the well-known nurseryman of South Glastonbury, Conn.				
Hale ✓ 1 year.....3 to 5 ft.	75	5 00		
Juicy ✓ Fruit as large as the Botan and of perfect shape; skin thin, light yellow underlined with scarlet; fruit deliciously sweet with sprightly acid and high plum flavor; keeps a long time after ripening, often fifteen to twenty days in hot weather. The tree is a hardy, luxuriant grower, beginning to bear when very young.				
Juicy ✓ 1 year.....3 to 5 ft.	75	5 00		
Normand ✓ Medium to large, skin clear golden yellow; flesh firm and meaty, yellow, and of high quality; pit small. Tree symmetrical and prolific.				
Normand ✓ 1 year.....3 to 5 ft.	75	5 00		
Red June ✓ Fruit medium to large, deep vermillion red all over with handsome bloom; flesh light lemon yellow, firm, moderately juicy, slightly sub-acid and of good quality. Tree vigorous and productive. A valuable early market variety.				
Red June ✓ 1 year.....3 to 5 ft.	75	5 00		
Willard ✓ Earliest and best of all market varieties excepting possibly the Red June. Fruit of good size and of a brilliant crimson color. The tree is one of the healthiest and hardiest of the Japanese varieties.				
Willard ✓ 1 year.....3 to 5 ft.	75	5 00

Imperiale Epineuse (New)—On Almond,				
1 year.....	35	2 50	20 00	
1 year	25	2 00	18 00	
Undoubtedly the finest Prune of the regular drying class yet introduced to this State. Like many other valuable varieties, it owes its origin to France. Our Mr. Rock received it among a collection he imported from that country, a flattering reputation accompanying it. Experiments have proven its value as a drying Prune—its early, regular, heavy bearing qualities being evident at all times. With its uniform large size, reddish or light purple color, thin skin, sweetness and high flavor, experts have no hesitation in				

	Each.	Per 10.	Per 100.	Per 1000.
Prune—				
pronouncing it <i>the best dried Prune they have seen</i> , and predicting for it <i>the leading place</i> on the market, when produced in sufficient quantity to make itself felt.

Olive —All olive trees offered have been twice transplanted, are stocky and well-furnished with roots. The grafted trees are worked on Wild and Picholine stocks three years old or more. We dig all olive trees with bare roots, and cut back all side limbs to one inch of main stem, so there is little of the foliage left, and consequently less evaporation in transplanting. After planting, tops should be cut down from one-half to one-third of their height, and the roots should never be allowed to become dry from the time they are received from the nursery until planted.

ORNAMENTAL DEPARTMENT

Deciduous Ornamental Trees

TRAINED TREES

This class includes a variety of large-sized trees, whose straight, regular stem were headed back or cut down to a uniform height of nine feet, and handsome, well-formed heads grown thereon. They are in splendid shape for planting on avenues, streets, or roadsides, for immediate effect. With ordinary care, little or no loss should occur in moving them, as they have been frequently transplanted.

Evergreen Trees and Shrubs

Nearly all the plants mentioned under this heading have been transplanted once or oftener, thereby adding greatly to the certainty of their growing. In order to reduce the amount of soil and consequent high freight charges, especially in shipping to distant points, we have grown those varieties most in demand in pots.

		Each.	Per 10.	Per 100.

Palms, Dracaenas, Agaves, Yuccas, Etc.

Palms.

Palms have now become almost indispensable in all decorations, whether for apartments, or conservatories, or the production of tropical effects in landscapes. When planted out, no class of plants makes such a grand display, and none are of more easy culture. Rich soil, mulching, and watering will in a short time, produce grand specimens.

While our main stock of these highly desirable garden ornaments is grown in the open ground, thereby obtaining the finest plants, we also cultivate more or less of each variety in pots or boxes. These are well-established, well-furnished specimens, suitable for hall or house decorations, or, where immediate effect is desired out-of-doors, they can be used to great advantage being almost absolutely safe from any set-back. We distinguish the hardy sorts with an (*).

Having determined to keep fully up with the times in the propagation of this beautiful flower, we have greatly enlarged our facilities to supply the ever-increasing demand, and can now offer a collection such as can not be found elsewhere on the coast, and in but few other establishments on the continent. The plants offered are strong and vigorous, have been grown entirely in the open ground, and consequently will not require the careful nursing necessary to those propagated under glass in three months' time, and sold at low rates. They can not fail to give entire satisfaction the first summer after planting. From November to March they can be shipped in a dormant state, packed in moss. Varieties marked with a (*) can be had budded in tree form (usually called *standards*) on a single stem three to four feet high. For culture best adapted to each class, we refer to our Descriptive Catalogue No. 2.

New or Scarce Roses

Price, 40 cents each; any ten, \$3:50; entire collection for \$10.

American Belle (Hybrid Perpetual). A sport from American Beauty, of a pleasing shade of pink; very distinct.

Amy Robsart (Hybrid Sweet Brier). One of a class of roses forming a distinct break from all others; the foliage of every one of them is as sweetly fragrant as that of the common Sweet Brier; they are wondrously free bloomers and vary in color from pale yellow and terra cotta to crimson; they are vigorous growers and perfectly hardy in any situation; flowers single or semi-double. Amy Robsart is single and of a beautiful deep rose color.

Anne of Geierstein (Hybrid Sweet Brier). Dark crimson.

Beaute Inconstant (Tea). Bright Capucine red, shaded and lined carmine and bright yellow; a novel and distinct color.

Belle Poitevine (Rugosa). A strong, vigorous grower, with beautiful foliage; very free and branching, and every tip laden with immense bouquets of large, pink roses; buds very long; perfume exquisite and quite unique.

Belle Siebrecht (Hybrid Tea). A truly superb rose, a cross between La France and Lady Mary Fitzwilliam; color, a solid pink of the richest shade (a rare color); flowers sweetly perfumed and large, beautifully formed and of long, tapering shape; a free bloomer and vigorous grower.

Chedanne Guinoisseau (Rugosa). Vigorous, healthy grower with handsome foliage, and large, full flowers of a beautiful satiny rose color; free bloomer.

Climbing White Pet (Climbing Tea). An unusually strong grower, with handsome, clean foliage and pure white, very double flowers borne in clusters, and produced in great profusion.

Climbing Souv. de Wooton (Climbing Tea). A splendid new variety, a sport from Souv. de Wooton with which it is identical excepting in its strong, rampant, climbing habit of growth, which often reaches 15 feet in one season; wonderfully free blooming; flowers bright magenta red, large, full, and of fine form.

Dundee Rambler (Ayrshire). Vigorous climber, with small white flowers tinged rose as they open fully.

Empress of China (Hardy Climber). An exceedingly rapid grower and perpetual free bloomer; vigorous and hardy; flowers of medium size, very graceful form and high fragrance; color soft dark red in bud changing to lighter red or pink as it expands; blooms from May till December; introduced from China.

Enchantress (Tea). Flowers creamy white, slightly tinted with buff in the center; large, full, and globular; the petals slightly recurved at the edges; of vigorous growth, fine foliage, and great freedom in blooming; a most distinct and effective tea rose.

Flora McIvor (Hybrid Sweet Brier). White, tinged rose.

Fortune's White (Banksia). Strong, rapid grower with fine, glossy leaves which it retains throughout the winter; flowers white.

Graziella (Tea). A quick, free, and healthy grower, commencing to bloom early and continuing to do so freely throughout the season; flowers large, finely formed, double; color creamy white, shaded with faint blush.

Improved Rainbow (Tea). Entirely distinct in its markings; the Improved Rainbow, instead of being broadly marked like its parent, the Rainbow, is penciled with brightest Gontier color, every petal in every flower, and base of petals are of bright amber color, making a very distinct and charming flower.

Lady Penzance (Hybrid Sweet Brier). Fawn, changing to Austrian copper.

Manda's Triumph (Hybrid Wichuraiana). This grand rose is of free growth, luxuriant foliage, and produces large clusters of double pure white flowers, beautifully imbricated, and well formed, two inches in diameter and sweetly scented.

Mrs. Pierrepont Morgan (Tea). A sport from Mme. Cusin, in every way much superior to that variety; the flowers are much larger and very double, petals are broad and massive; prolific bloomer; color intensely bright cerise or rose pink; considered one of the finest and most beautiful in form, color and substance ever introduced.

Mrs. W. C. Whitney (Hybrid Tea). Clear deep pink, very fragrant; flowers large and full; a free grower with nice foliage.

Polyantha Grandiflora. Large panicles of pure white bramble-like flowers produced in great profusion in the blooming season; of climbing habit and robust growth; very useful to cover old fences, trees, buildings, etc.; very hardy.

Pink Soupert (Polyantha). A seedling from Clothilde Soupert, with rosette-shaped flowers varying from pale pink to red.

Princess Bonnie (Tea). Rich vivid crimson, large, semi-double with fine petals, exceedingly fragrant, beautiful long buds.

Single White Banksia. A sport from the White Banksia and originating on these grounds; flowers single in large clusters; quite distinct.

South Orange Perfection (Hybrid Wichuraiana). Grows freely close to the ground and produces multitudes of small, most perfectly formed double flowers, soft blush pink at the tips changing to white; lasts a long time in perfection.

Souvenir de Pres. Carnot (Hybrid Tea). The finest rose offered in many years; the combination of colors, pink and white tints, is the loveliest we have ever seen; the beauty of form can not be surpassed; in addition it is a strong, free grower, with handsome foliage, easy to manage and easy to propagate.

Universal Favorite (Hybrid Wichuraiana). The most vigorous variety of its class; the long branching shoots are covered with bright green foliage; the double flowers of a beautiful rose color, similar to the Bridesmaid, are deliciously fragrant; a grand variety for any purpose.

Williams Evergreen (Climbing Evergreen). A strong growing climbing rose with very large foliage and producing immense clusters of white flowers; foliage retained all year.

Wichuraiana (Japanese Creeping Rose). A low, trailing species, its stems creeping on the earth as closely as the ivy; the flowers are produced in the greatest profusion, in clusters on the end of every branch; they are pure white and are very fragrant.

Yellow Rambler (Aglaiia). A new hardy climbing rose of the Crimson Rambler type; flowers of medium size and double form produced in large clusters over the entire vine; color a fine shade of yellow, darker than Coquette de Lyon.

Roses—General Collection.

Price, each 25 cents; per 10, \$2.00; per 100, \$18.00. Standards, \$1.00 each.

TEA OR EVERBLOOMING.

Cherokee, double white.
Cherokee Single, single white.
*Musk Fringed, white.

*Stanwell's Perpetual, blush color.
York & Lancaster, white, striped pink.
Sweet Brier, or Eglantine.

CLIMBING ROSES.

These will be found described in the various preceding classes to which they belong. We collect them under this heading for the convenience of our patrons. They are very useful, and highly valued for training over arbors, trellises, and verandas; and as screens for unsightly objects, such as fences, walls, etc., they can not be surpassed.

Baltimore Belle, Prairie.
Climbing Aimee Vibert, Noisette.
Climbing Captain Christy, Hy. Per.
Climbing Devoniensis, Tea.
Climbing Hermosa, Bourbon.
Climbing Niphotos, Tea.
Climbing Perle des Jardin, Tea.
Climbing Queen of Queens, Hy. Per.
Climbing Souv. de Wooton, Tea.
Climbing White Pet, Tea.
Celine Forestier, Noisette.
Cherokee Single, Cherokee.
Claire Carnot, Noisette.
Cloth of Gold, Noisette.
Crimson Rambler, Polyantha.
Dundee Rambler, Ayrshire.
Elie Beauvillian, Tea.
Emp. of China, Hardy Climber.
Gloire de Dijon, Tea.

Yellow Rambler, Aglaia.

Gloire de Margottin, Hy. Per.
Glory of Waltham, Hy. Per.
Gold of Ophir, Tea.
Jaune Despres, Noisette.
Lamarque, Noisette.
L'Ideal, Noisette.
Marechal Niel, Noisette.
Polyantha Grandiflora.
Reine Marie Henriette, Tea.
Reine Olga de Wurtemberg, Tea.
Reve d'Or, Noisette.
Single White Banksia, Banksia.
Souv. de Madam Metral, Tea.
Wichuriana, Japanese Creeping.
White Banksia.
William Allen Richardson, Noisette.
Williams Evergreen, Climbing Evergreen.
Yellow Banksia.

Herbaceous, Bedding and Border Plants

	Each.	Per 10.	Per 100.
Abutilons —In variety, 5-inch pots.....	25	2 00	
Achania —Malviviscus, 5-inch pots.....	35		
Achillea —The Pearl.....	50		
Actinidia —Arguta	50		
Anemone —Japonica alba.....	35		
Hybrida.....	35		
Armeria —Sea Pink or Thrift.....	15	75	4 00
Arundo —donax	25		
Variegated (Variegated Reed)	50		
Asparagus —Plumosus, 5-inch pots.....	50		
Sprengerii, 5-inch pots.....	50		
Aspidistra —Lurida, 5-inch pots	50		
Variegated, 5-inch pots.....	75		
Asplenium —Bulbiferum (Bulb-bearing Fern) 4-inch pots.	35		
Banana —Abyssinian (<i>Musa Ensete</i>)			
10x10-inch box..... 4 to 5 ft.	1 00		
5-inch pots	75		
4-inch pots	50		
Beconia —Cordata Jedensis.....	50		
Begonias —Flowering, 4 and 5-inch pots.....	35		
Brugmansia —Knightii, Double, 7-inch pots.....	75		
5-inch pots.....	50		
Canna —New sorts.....	50		
Austria, pure canary color			
Beaute Poitevine, bright rich crimson.....			
Florence Vaughan, bright rich golden yellow, spotted with bright red.....			
Egandise, soft currant red.....			
Italia, bright orange scarlet, border golden yellow.			
Queen Charlotte, rich scarlet crimson.....			
Canna —French sorts, 16 kinds	25	2 00	
Caryopteris —Mastacanthus (Blue Spirea).....	25		
Carnations —New, 2-inch pots.....	25	2 00	
Abundance, salmon pink, approaching red			
Armazindy, snow white, lightly penciled scarlet			
C. A. Dana, delicate shell pink.....			
Flora Hill, white, of enormous size.....			
Harrison's White, pure white.....			
Jubilee, color intense scarlet, of richest shade			

		Each.	Per 10.	Per 100.
Carnations—New.				
Lily Dean, pure white ground, margined with clear pink.....				
Mayor Pingree, clear lemon yellow.....				
Mrs. Chas. Duhme, delicate pink.....				
Mrs. Geo. M. Bradt, clear white, edged and striped with scarlet.....				
Mrs. McBurney, clear salmon.....				
Morello, scarlet crimson, with maroon shad- ings.....				
Victor, bright salmon pink.....				
Triumph, pure bright pink.....				
Carnations—Assorted 5-inch pots.....	25	2 00		
2-inch pots.....	15	1 00		
Alaska, pure white.	Lizzie Guilbert, bright
